

Customer Audit Findings Report

Fabrikam Semiconductor — Supplier Quality System Audit

Auditee	Zava Microelectronics (Advanced Packaging & Test)
Audit dates	2026-09-15 to 2026-09-17
Audit type	Annual supplier quality system audit
Lead auditor	K. Bergstrom / Supplier Quality, Fabrikam
Co-auditor	A. Duval / Supplier Quality, Fabrikam

The audit covered document control, wire bond, plasma clean, mold, marking, test, shipping and gauge management. Eight findings were raised.

Findings

No.	Area	Finding	Severity
1	Document control	Work instruction WI-BD-07 was not revised per ECN-2608-11; Rev.C is still in use on the floor	Major
2	Wire bond	Both Rev.C and Rev.D of the work instruction are present at the station, and operators were not told which one governs	Major
3	Mold	The mold parameter sheet revision does not match the ECN-2608-11 effective date and still carries the previous conditions	Major
4	Test	Test program version records are missing for four working days, 3 to 8 September 2026	Minor
5	Shipping	Shipment labels dated 5 September 2026 still carry the old -C part suffix instead of the -D required after the ECN	Major
6	Document control	Superseded documents were not withdrawn from the floor; one copy was found at wire bond and one at mold	Major
7	Training	Three new operators have not signed off the annual ESD refresher training	Minor
8	Quality assurance	The calibration label on gauge CMM-03 expired on 30 August 2026 and the gauge is still in use	Major

Response requirements

1. The auditee shall submit a corrective action plan (CAP) within 10 working days, by 2026-10-01.
2. For findings graded Major, an interim action shall be provided within 3 working days and shall not be deferred into the permanent action.
3. Each CAP shall state the finding number, root cause, interim action, permanent action, responsible department, due date and verification method.
4. Severity grades in this report are not subject to unilateral revision by the auditee. Any objection shall be raised in writing within 3 working days.
